HYPEREGIO

A cross-border value chain for your innovation

HYPEREGIO has created a gateway for small and medium-sized enterprises (SMEs) to explore and profit from cross-border activities.

Goal was to expand SMEs knowledge and to connect them with HYPEREGIO R&D institutions and universities in order to improve their cross-border activities.

HYPEREGIO technology transfer- and business development support managers of almost 30 partners guided and supported interested parties through the early stages of cooperation and / or consortia building in the Greater EMR area.

Besides an „early-stage“ grant to start a cooperation with a knowledge institute from across the borders or a double-grant for starting a cross-border B2B-consortium, participants could take advantage of additional European or regional funding schemes to realise a marketable solution for their innovation.

Although HYPEREGIO projects „EarlyTech“ and „Innovation2Market“ will end, partners of „BuSyBee“ will continue to support euregional companies in finding suitable cooperation partners and financial support for their innovation projects.

Businesses are in the driver's seat of HYPEREGIO: Choose from our offers and services – whatever you need!
