## The Technology Breakfast

INVITATION  
**Tuesday**  
**27.11.2018**  
**8.15 h**  
**EdgeWave**  
**Würselen (D)**

A **Cross Border** Networking Event

## Get up early and think about tomorrow!

Clever entrepreneurs deal at an early stage with questions of the future and key technologies that may be relevant for the development of their company. They seek to exchange information with other entrepreneurs on market trends and take advantage of the opportunity to collaborate with the knowledge and research landscape in the Euregio Meuse-Rhine. Their goal is to transform today's problems into tomorrow's successes - through cooperation, projects and with the right partners.

We support you in this. Free of charge, confidential and non-binding.

With the series of events "EarlyBirds" we invite you together with our partners of the euregional project "HYPEREGIO - EarlyTech" to discuss future topics at an early hour. We would like to inspire you to reflect and think outside the box and offer you a networking platform in a relaxed (breakfast) atmosphere with a host entrepreneur.

### We look forward to welcoming you!

## HYPEREGIO – EarlyTech

### Initial Aid for Your Innovation

The basic idea of HYPEREGIO - EarlyTech is the  
active initiation, promotion and improvement of  
technology and knowledge transfer, the  
cooperation between universities and small and  
medium-sized enterprises (SMEs) in the Euregio  
Meuse-Rhine as well as the support of innovative  
SMEs in attracting and retaining young people,  
specialists and managers.

SMEs from the Euregio Meuse-Rhine are invited

- to participate in events and programmes related  
to cross-border personnel management.
- to get to know our technology transfer managers,  
who will connect you with suitable, transnational  
scientific institutes.
- to participate in euregional technology- or  
industry-specific business-to-science (B2S)  
events (EarlyBirds Technology Breakfast,  
Business meets Science, etc.)
- to receive our B2S Voucher: Get a grant of  
**€ 3,000** to explore an initial collaboration with a  
scientific institute and achieve your specific  
technology goals.
